

# Monsoon Escapades

## Of Butterflies and Bees....

**L**end of the early monsoon heavy rains brings out the best in the nature.

Vibrant yellow and orange Cosmos flowers appear almost out of nowhere. With their colour, they attract the bees....

*Swarming over the flowers, they feast on the nectar, getting themselves powdered with the pollen grains.*

*With moths changing into flying beauties, the months of August, September and October are a treat for butterfly lovers.*

*A not-so-common and not-so-rare variety of colourful butterfly, aptly named "Painted Lady" makes a great photography subject.*

*Lock a moment in time Make it live forever*

**T**he galore does not end with insects and animals. There is a whole spectrum of colours coming out of the earth in the form of endless variety of wild flowers.

Almost unimaginably large palette of colours and endless patterns and designs cover the surface.

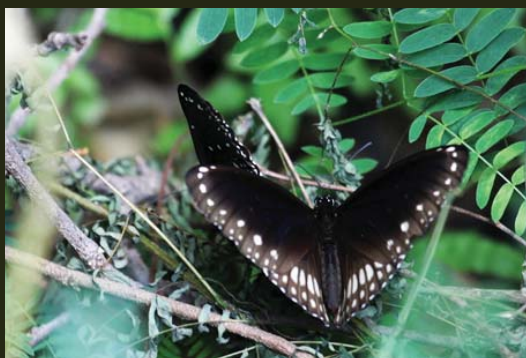

*Vibrant, vivid and beautiful, monsoon brings out the life, spirit and charm of life.*

*Great time to look for the tiny, small and beautiful..*

*Perfect opportunity to get your Macro lens in action, your feet in motion....*
